

WEEK 8

alicia tan

2023-10-11

```
library(shiny)

# Define UI for displaying current time ----
ui <- fluidPage(
  titlePanel(code("TIMER")),
  h1(textOutput("currentTime")),
  p("hello, this is a live timer of Singapore clock!!")
)

# Define server logic to show current time, update every second ----
server <- function(input, output, session) {

  output$currentTime <- renderText({
    invalidateLater(1000, session)
    paste("THE TIME NOW IS", Sys.time())
  })

}

# Create Shiny app ----
shinyApp(ui, server)
```

```

TIMER

THE TIME NOW IS 2023-10-11
19:59:07

hello, this is a live timer of Singapore clock!!

```
knitr::include_graphics("AWESOME.JPG")
```

A day in My life

awesome!
