

read\_delim {readr}

R Documentation

# Read a delimited file (including CSV and TSV) into a tibble

## Description

`read_csv()` and `read_tsv()` are special cases of the more general `read_delim()`. They're useful for reading the most common types of flat file data, comma separated values and tab separated values, respectively. `read_csv2()` uses `;` for the field separator and `,` for the decimal point. This format is common in some European countries.

## Usage

```
read_delim(  
  file,  
  delim = NULL,  
  quote = "\"",  
  escape_backslash = FALSE,  
  escape_double = TRUE,  
  col_names = TRUE,  
  col_types = NULL
```
